

Lacking Wintertime Traction?

TRACKGLASS

JUST \$325* PER DRUM

*PLUS SHIPPING + HANDLING

TRACKGLASS IS THE MOST EFFECTIVE AND ECONOMICAL STEEL-ON-STEEL TRACTION.

EASY TO USE

- TrackGlass does not absorb moisture and clog hoppers when wet like other media.

EFFECTIVE TRACTION

- Because of its angular shape, TrackGlass provides effective traction for mobile railcar movers.
- TrackGlass is specially designed to work effectively in all rail yards and for small to medium-sized loads.

ECO-FRIENDLY

- Customers in the grain milling and food industries appreciate the non-hazardous MSDS performance.
- The glass is non-toxic, odorless, non-flammable, and non-sparking.
- Every ton of recycled glass can save up to one ton of natural resources.
- TrackGlass reduces the need for landfill expansion; landfilled glass takes up to a million years to break down.
